WELCOME!

24th November
Poultry Research Resources Planning Workshop
Thank you for participating

• Guelph
• Saskatchewan
• Manitoba
• Dalhousie
• Atlantic
• McGill
• Alberta

Input From:
• Calgary
• Montreal

• Burnbrae Farms
• AAFC
• NSERC
• OMAFRA
• CPRC
• LRIC

• Warren
Thanks for pulling this together

- Tina
- Mary
- Bruce
- Rebecca
- Sarah (not here today)
- Warren

Thanks to Rosita for presenting

Thank you to NSERC for the financial support
What today is not about

- It's not about developing research priorities
  - But we do need to discuss what new opportunities are coming and the nature of those opportunities (Rosita will help).
- It's not about deciding who will do what where and when
- It's not about money/funding/grants
What today is about

- Determining/imagining and recording our collective thoughts and ideas on a future for HQP and facilities for poultry research across Canada
- Ensuring we leave with a collectively derived idea that can be developed into a plan incorporating some known and some (as yet) unknown elements:
  - HQP needs across Canada?
  - Facility Upgrades/Rebuilds at Guelph
  - Facility Upgrades/Rebuilds elsewhere?
Role of LRIC and CPRC

• LRIC has a Provincial Mandate – industry led
  – Ensure our members research needs are met
  – Ensure we have a plan for HQP and Infrastructure for Research
  – Ensure Research results are used

• CPRC has a National Mandate – industry led
  – to support poultry research in Canada
Both Organizations

• Administer poultry research (CPRC funds it as well)
• Have a responsibility to our members and funding orgs to ensure that they get the best bang for their buck from research – and *money is tight*.
• Are keen to see:
  – World class research carried out in Canada and utilized in Canada
  – Efficiency without losing productivity
Today is about......

• Creating a future in which we will be as good as we can be at “doing and using” research
• Possibilities, ideas, strategizing
• Collaborations, synergies, mutual benefit, a collective approach, camaraderie
• Planning, Outcomes and Winning
• Enjoying each others company and.....
Today is about......

• Building a truly Canadian Poultry Research Team and.......  
• Creating the places and spaces (physical and virtual) for the team will work in.

Enjoy the day and thank you one and all for coming.
